The aim of the present study was to evaluate the relationships between ghrelin and growth hormone (GH) concentrations with body mass, appetite and psychotic symptoms. In a group of schizophrenic inpatients we observed that body mass index (BMI) was positively correlated with ghrelin and GH concentrations. Positive correlations were found between GH concentrations and the Positive and Negative

Syndrome Scale (PANSS) general score and the following PANSS subscores: positive, negative, depression, and anxiety. Ghrelin concentrations correlated positively with GH and PANSS general scores. We hypothesize that the positive correlation between GH and ghrelin with body mass could be a signal of the severity of the disorder, which, in its turn, is associated with the loss of appetite and the exacerbation of psychotic symptoms. Just days after Disney's "Star Wars" dominated the box office with "The Last Jedi," the Mouse House will release "Solo: A Star Wars Story." The Disney/Lucasfilm film will be released in the United States on May 25. At the "Star Wars" fan event hosted in San Francisco on Friday, Disney Chairman Bob Iger and Lucasfilm President Kathleen Kennedy promised that "Solo" would be "one of 82157476af
